Cyber security regulation for your IoT devices now mandatory!

kiwa

IoT

1 AUGUST 2024

2024 AUGUST

From this date, IoT products for the EU market must comply with articles 3.3 d, e & f of the Radio Equipment Directive (RED) 2014/53/EU. For industrially oriented products this is possible using the international standard IEC 62443-4-2.

ONE-STOP-SHOP

Kiwa and KPN Security have combined their expertise into a one-stop-shop for independent testing, assessment and certification.

THE ASSESSMENT IN 3 STEPS

Verification of documentation

Functional tests

Cybersecurity tests based on the requirements of the standard, such as password assessment, network segmentation and cryptography.

Results reporting and certification

THE BENEFITS TO YOU

- ✔ Fast market access

- ✔ Compliancy by using widely accepted International Standard.

- ✔ RED (2014/53/EU) certification of your product.

- ✔ Create added value by using the Kiwa IoT cyber security label, show your customers your product is tested and approved independently.

Together we improve the cyber safety of IoT products and create trust in the market.
